--------------	------------------------------	------------------------------

Include the following details: -

- All property boundaries clearly marked.
- Where possible show street features for orientation (e.g., signposts, lamp posts, hydrants, etc. ).
- Location of the water meter box/Toby.
- Location of the new backflow prevention device.
- Verification that the device is **downstream** of the meter and as close as possible to the boundary.
- Measurement with the **distance** between the water meter and the backflow device.
