

Do you wish to speak in support of your submission?: Yes

Do you support the disposal of Grove Street Park? : Yes, I support the disposal of Grove Street Park

Let us know why:

The Grove street park is too small to accommodate both growth with the new subdivision and also continued growth of younger families in the wider Tinwald areas. The gear at the Grove street park is dated and with new health and safety laws would nearly be deemed unsafe, I'm unsure of the exact age of that gear but my wife used to play at this park as a kid and she was born in 1973. The developer's have offered a new park with new purpose made play gear in a contained, larger and well located section within their new subdivision, This is the obvious step to take making the Grove street park one of two access ways to the new subdivision. I spent two terms (6 years.) on the board of trustees at Tinwald school and I have a good idea on the role growth during that time and with the new subdivision the role is only going to increase so if the only access to the subdivision was Grahams road this would mean a lot of people and children on the south side of an already busy road. If the Grove street park was also an access way these people could exit the subdivision and walk, bike or drive along Grove street and along Jane street and they are at school safely without having to go near the busy Grahams road and kids would be safe enough to do this on their own where as I wouldn't like my children going anywhere near Grahams road to get to school on their own. With two access ways to the new subdivision also creates better traffic flow for the likes of emergency services in case one access way in some way gets blocked emergency services can enter the subdivision from the other access way.

Do you have any further comments?:

I understand that all submissions are public documents and will be made available on Council's website with the names of submitters included:

Yes
