Draft Waste Management & Minimisation Plan	
We are proposing to introduce household kerbside food waste collection. Other districts have done so at a cost of about \$50 per household per year. Would you support a kerbside food waste collection service being implemented?:	No
Why?:	I would support the optional use of one, where households can choose to opt in at the required price. We have a compost bin at home, which is far more environmentally friendly than centralising the system. People should be encouraged and educated in how to do this at their own place. Done properly, this only takes 1m squared of land, as the bin composts at the same rate it is filled. Who in the district does *not* have access to that?!
Do you agree with the key issues in the draft Plan? If so, which issues do you agree or disagree with?:	No
Why?:	I have not read the draft plan. I have just looked at the overview.
Do you agree with the proposed actions in the draft Plan? If so, which actions do you agree or disagree with?:	No
Why?:	Ditto
Do you have any other comments?:	I don't believe so.
