Which ones do you support and why?

Which ones don't you support and why?
Is there anything else we need to think about for parking in the district?

If you own, or are considering purchasing an electric vehicle in the future, do you think more charging stations should be provided in more public locations than currently?

No - It is not your responsibility to provide charging. If people want to charge electric cars they do so on their own. If companies want to provide charging stations the council should lease land and they build them at their own risk. Ratepayers should not foot the bill for this folly.

If you own, or are considering purchasing an E-bike in the future, do you think parking facilities should be provided in public locations?

No - Same as above for electric cars.

Do you support the addition of drivers over 80 years to the Mobility Parking Policy?

No
