<b>Draft Waste Management &amp; Minimisation Plan</b>	
We are proposing to introduce household kerbside food waste collection. Other districts have done so at a cost of about \$50 per household per year. Would you support a kerbside food waste collection service being implemented?:	Yes
Why?:	This is a good idea. Has been going in the UK for a long time, sadly NZ is a bit behind the times. The sooner they get on board the better for the environment.
Do you agree with the key issues in the draft Plan? If so, which issues do you agree or disagree with?:	Yes
Why?:	User pays for business is a good idea.
Do you agree with the proposed actions in the draft Plan? If so, which actions do you agree or disagree with?:	Yes
Why?:	As long as it is clear to people it should make a huge difference to landfill. The waste could then be turned into compost and sold back to the community.
Do you have any other comments?:	the outcome needs to be concise and be understood by all. The benefits to the environment are also paramount. Not sure how people would agree to the \$50 dollars a year, rate payers would pay but what about people not owning their own homes, it should be a fair system for all.
