Do you wish to speak in support of your submission at the hearing?:	No
If yes, do you wish to support your submission in person or virtually?:	
Draft Waste Management & Minimisation Plan	
We are proposing to introduce household kerbside food waste collection. Other districts have done so at a cost of about \$50 per household per year. Would you support a kerbside food waste collection service being implemented?:	Yes
Why?:	If it means that more things can be recycled or divided into the appropriate recycling and waste methods, then yes. if it means that the community pays less in the long run at the dump, then yes.
Do you agree with the key issues in the draft Plan? If so, which issues do you agree or disagree with?:	Yes
Why?:	Discounted dumping for rural waste to encourage less landfill use on farm. More education for rural and businesses on waste management and recycling. Charges at the Resource Recovery Parks may need to be reviewed or discounted to encourage correct waste disposal. Organic waste, is this composted and then reused in the community somehow? Parks & gardens, schools etc?
Do you agree with the proposed actions in the draft Plan? If so, which actions do you agree or disagree with?:	No
Why?:	'Implement the solid waste management and minimisation bylaw, requiring operators to be registered' what cost impacts will this have? will it reduce barriers to entry? will it increase costs to carry out the collection/disposal? Instead of imposing regulations (does not specify what they are) perhaps you should 'work with' operators to create more achievable outcomes
Do you have any other comments?:
