Draft Waste Management & Minimisation Plan	
We are proposing to introduce household kerbside food waste collection. Other districts have done so at a cost of about \$50 per household per year. Would you support a kerbside food waste collection service being implemented?:	Yes
Why?:	I think it would really be worthwhile esp for those of us that live on really small sections that don't allow for an area for compost or chickens, pigs or the like. This would also mean less going into landfill
Do you agree with the key issues in the draft Plan? If so, which issues do you agree or disagree with?:	Yes
Why?:	I like the positive affect this would have on the environment and that it would help towards zero waste.
Do you agree with the proposed actions in the draft Plan? If so, which actions do you agree or disagree with?:	Yes
Why?:	I like that you want to achieve effective and efficient waste management and minimisation within the district. However pricing definitely needs to be affordable, especially to encourage everyone to 'buy into' the scheme.
Do you have any other comments?:
