Q7

Up to 14 hangar homes (medium density)

Referring to the hangar homes proposal on page 8 of the consultation document (click here to view), what is your preferred density of hangar homes?

Q8

Do you have any other comments or feedback about this draft plan?

Just one point. If introducing hangar homes, they may not be compatible with a larger volume training organization due to the increased noise issues. Also, having a larger training organization would typically mean a significantly larger volume of low hour pilots, possible language issues, and an increase in the number of incidents.
