

Infometrics Local Economic Insights

Local Economic Insights Dashboard

Focus on: Ashburton District

Infometrics Local Economic Insights (LEI) Dashboard

This Dashboard presents a range of high-frequency indicators that provide some insights into local and regional economies, alongside some key national-level trends.

The Dashboard is updated monthly, around the middle of the month, with the latest data available in the week leading up to the publish date. Data series available in the Dashboard include daily, weekly, and monthly data, but for completeness monthly updates are provided.

The Dashboard is experimental in nature, and as Infometrics receives feedback on its usefulness, we will assess the continued use, and any possible refinements, to the Dashboard. The Dashboard will be available until the end of December 2020, when Infometrics will evaluate the Dashboard and determine next steps.

The Dashboard is still experimental, and Infometrics will make refinements as necessary. Individual pages of the Dashboard can be printed by users. Only Infometrics clients can access the Local Economic Insights Dashboard.

Accompanying the Dashboard is our "State of the Economy" monthly note, which provides short insights into the current economic activities across New Zealand.

Any and all feedback is welcomed - please contact Brad Olsen with your views.
