

<b>Your details</b>	
First Name:	Peter
Last Name:	Murray
Do you wish to speak in support of your submission at the hearing?:	No
If yes, do you wish to support your submission in person or virtually?:	
<b>Draft Waste Management &amp; Minimisation Plan</b>	
We are proposing to introduce household kerbside food waste collection. Other districts have done so at a cost of about \$50 per household per year. Would you support a kerbside food waste collection service being implemented?:	Yes
Why?:	I support this for the community, but I would not personally use it. My household generates less than 4 litres of food waste per week and we compost this with other green waste from our garden.
Do you agree with the key issues in the draft Plan? If so, which issues do you agree or disagree with?:	Yes
Why?:	Currently some types of recyclable plastics are going to landfill because they are not accepted in the yellow recycling bins. How does the cost of separating and processing these types of plastic compare with the costs to the environment and the value of the resource that could be recovered?
Do you agree with the proposed actions in the draft Plan? If so, which actions do you agree or disagree with?:	Yes
Why?:	The council could investigate which types of waste could be processed locally in partnership with neighbouring councils. If each district processed a different type of waste, transportation efficiencies could be achieved. Can rail transportation be used for waste leaving the district?
Do you have any other comments?:
