Subject: Waste Management

My thoughts are this ;

I feel that those who dig there waste into their garden, should have a CHOICE to carry on doing that, and not be changed for waste pick up.

But having said that I am all for it.

I myself always DIG my veggie,fruit waste into my garden. Very good for the worms. Are you going to turn all the waste into compost and than sell to those who wish to buy it?

Kind regards

Margaret
