| If yes, do you wish to support your submission in person or virtually?: | |
| Draft Waste Management & Minimisation Plan | |
| We are proposing to introduce household kerbside food waste collection. Other districts have done so at a cost of about \$50 per household per year. Would you support a kerbside food waste collection service being implemented?: | Yes |
| Why?: | Having lived in Christchurch and experienced their waste and recycling services I was appalled on my shift to Ashburton to find that so much organic waste (shredded paper, food contaminated paper and cardboard, food scraps, green waste etc) was collected and disposed of in landfill. This is contrary to a cleaner environment and counter productive to effective climate change. A contributing factor to this is the charge made for green waste disposal. This waste goes to a composting facility, processed and then sold, this does not encourage buy in from residents, why pay for disposal when it is picked up for nothing in the red bin. My red bin goes out weekly full to the brim, of the contents I would estimate that 3 to 5 percent is proper landfill rubbish only the remainder is organic. I support kerbside organic waste collection as opposed to a food only waste collection. |
| Do you agree with the key issues in the draft Plan? If so, which issues do you agree or disagree with?: | |
| Why?: | |
| Do you agree with the proposed actions in the draft Plan? If so, which actions do you agree or disagree with?: | |
| Why?: | |
| Do you have any other comments?: | |
