**Subject:** Antony White | Draft Stormwater Bylaw 2022 Submission

Name: Antony White

Organisation (If appropriate):

Address:

Phone Number:

Email Address:

Do you wish to speak in support  
of your submission at the  
hearing?: No

Do you agree with our proposals  
to protect the stormwater  
network (clauses 5.1 to 5.6)?: No

Additional Comments: I disagree with Option 1 & 2, especially as you have indicated that there are no disadvantages with Option 1. There are pros and cons of every option, so it's a bit premature to say that there aren't any disadvantages.

Do you agree with our proposals  
to manage applications to  
discharge to the stormwater  
network (clauses 6.1 to 6.4)?: Yes

Additional Comments:

Do you agree with our proposals  
to manage stormwater discharge  
from non-residential sites  
(clauses 7.1 to 7.3)?: Yes

Additional Comments:

Do you agree with our proposed  
rules for earthworks (clause  
8.1)?: Yes

Additional Comments:

Do you agree with our proposals  
for maintenance of private  
stormwater systems (clauses 9.1  
to 9.2)?: Yes

Additional Comments:

Do you agree with our proposed  
penalties for breaches of the  
Bylaw (clauses 11.1 to 11.5)?: No

Additional Comments:

Do you have any other  
comments on the draft Bylaw?: I think that you are missing the point. I would rather see emphasis placed on grey water systems and collection of water off roofs for use in gardens (and grey water systems) even if consented by council. This will take pressure off the water network during droughts, plus potentially collect

some excess water during floods. Some industrial sites are high users of water, why not encourage and incentivise the design (including new and retro-fitted) to incorporate water tanks to collect runoff, with the relevant filter systems to take pressure off both run off and our drinkable water supply?
